

ISN'T IT TIME FOR A CHANGE?

With most EHRs, you're stuck. Stuck in the past with legacy technology. Stuck with workflows that don't conform to your needs. Stuck waiting for changes to be made by the vendor. And stuck with substantial costs once those changes are made.

WORKFLOWS SHOULDN'T WORK AGAINST YOU

Whether in a leadership role, providing care, or working behind the scenes to ensure systems are properly optimized, many EHRs create frustrating challenges for today's clinical personnel.

- Complex and inefficient workflows
- Having to create and use workarounds
- Every change to the system requires contacting the vendor, spending money, and waiting on long lead times

RIGID SYSTEMS LEAD TO ROADBLOCKS

The shortcomings of traditional EHRs aren't just inconvenient. They have tangible, negative impacts on the delivery of care.

- Frustrating hurdles lead to burnout which, in turn, leads to staff shortages
- Workarounds waste time, lead to information falling through the cracks, and increase the documentation burden
- Expensive off-site customization eats into budget and keeps staff waiting for crucial changes, while the quality of care suffers

EHRs WERE SUPPOSED TO REVOLUTIONIZE CARE. WHAT HAPPENED?

92%

of doctors say inefficient EHR systems negatively impact quality of care*

58%

of doctors cite document burden as their greatest cause of burnout**

63%

of doctors say time-consuming, burdensome reporting systems are their biggest pain point*

* Joe Corkery, MD, "Physicians say better data interoperability will save lives," Google Cloud, July 20, 2021

** Dennis Thompson, "Almost Two-Thirds of U.S. Doctors, Nurses Feel Burnt Out at Work: Poll," US News & World Report, February 23, 2023

IT DOESN'T HAVE TO BE THIS WAY.

IT'S TIME TO TURN A NEW PAGE

INTRODUCING THE

CLINICAL CONTENT BUILDER

With **Juno EHR's** Clinical Content Builder, you can make changes to workflows on-site, in real-time, without vendor involvement. It's just the beginning of the flexibility offered by Juno EHR. Because your EHR should be just that – yours.

The **Clinical Content Builder** is a collection of tools within Juno EHR that allows you to build and personalize custom Flowsheets, Note Templates, and Modules. This means you can easily create workflows from scratch or make adjustments to existing workflows to meet your needs.

THE PERKS OF PERSONALIZATION

Clinical Content Builder empowers your clinicians to make the system work the way they do. With simple drag and drop functionality and a graphical interface, it no longer takes an expert to create personalized workflows. And when a new need arises, you can address it without spending budget, experiencing down time, or waiting for changes to be made by a vendor.

REDUCE CLINICIAN BURNOUT

Easily tailor workflows by facility, department, or user's needs to remove obstacles and increase efficiency.

IMPROVE QUALITY OF CARE

Less time and resources spent on entering and retrieving data means more time spent with patients.

NO-CODE/LOW-CODE DESIGN

Changes that took weeks and thousands of dollars to get made can now be done by your team, on-site, in real time, without vendor involvement.
