

MEET THE EHR THAT **WORKS THE WAY CLINICIANS WORK**

Juno Health's cloud-based acute care solution is designed with the end user in mind. With unprecedented, system-wide customization capabilities that are governed at the organizational level, Juno EHR for Acute Care can be adapted by facility, department, or role. With this level of personalization, workflows work the way you do, and documentation captures all vital points of data, without redundancies or irrelevant fields. And all this can be done without vendor involvement.

Our Acute Care EHR is built BY clinicians FOR clinicians. It's intuitive design cuts down on frustrations, removes the need for workarounds, and frees healthcare providers to spend more time with their patients and less time charting.

Our modern, ONC certified EHR is designed with HL7 FHIR APIs as a starting point—not a retrofit. It is USCDI compliant out of the box in support of true interoperability. Juno EHR for Acute Care is able to connect with today's bestin-class systems, while being ready for tomorrow's innovations.

THE JUNO EHR FOR ACUTE CARE DIFFERENCE

These powerful, intuitive features are designed to make it easier and more efficient for you to provide excellent care and achieve better patient outcomes.

CLINICAL CONTENT BUILDER

Juno EHR's Clinical Content Builder offers powerful tools to personalize workflows, notes, and assessments by facility, department, or role. Its graphical interface and drag-and-drop functionality enable easy customization without rewriting code or increasing costs.

BUILD-A-MODULE

Juno EHR's Build-a-Module empowers in-house teams to adapt to changing business needs, trends, regulations, and industry standards. This tool allows the creation of personalized modules, including patient lists meeting specific criteria, configurable dashboards for patient overviews, and individual patient views. Build-a-Module supports service-line expansion and ensures compliance with evolving standards and regulations.

PRODASH

ProDash streamlines workflows with human-centered design, realtime analytics, and patient-specific notifications. It identifies risks, suggests additional treatments, and supports value-based patient care, enabling clinicians to easily make informed decisions.

CLINICAL ACTION CENTER

The Clinical Action Center provides nurses with a real-time summary of clinical information to help plan and prioritize shifts effectively. It features a Patient Card for detailed notifications, a smart task list, and configurable options tailored to specific units, patients, and individual preferences, reducing search time and improving shift transitions.
