

WE PUT CLINICIANS FIRST SO YOUR PATIENTS NEVER COME SECOND

Juno Health's cloud-based behavioral health solution is designed with the end user in mind. With unprecedented, system-wide customization capabilities that are governed at the organizational level, Juno EHR for Behavioral Health can be adapted by facility, department, or role. With this level of personalization, workflows work the way you do, and documentation captures all vital points of data, without redundancies or irrelevant fields. And all this can be done without vendor involvement.

Our behavioral health EHR is intuitively designed to anticipate the unique needs of behavioral health. It includes more than 150 assessments and documentation, extensive Treatment Plan options, and helpful features like Group Notes, Session Manager, and robust scheduling. Additionally, our single dashboard design allows clinicians to review information without clicking from screen to screen, saving time and reducing frustrations.

THE JUNO EHR FOR BEHAVIORAL HEALTH DIFFERENCE

These powerful, intuitive features are designed to make it easier and more efficient for you to provide excellent care and achieve better patient outcomes.

SINGLE DASHBOARD CONVENIENCE

With our behavioral health solution, you no longer have to constantly click back and forth between different screens to compile, share, and access vital patient information. From one screen, team members can view, analyze, and determine the next steps in the patient's care.

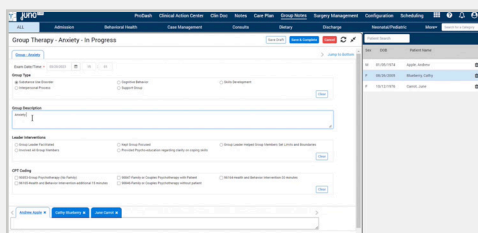

NEXT LEVEL TREATMENT PLANS

The Treatment Plans application offers pre-configured behavioral health templates with suggested goals, objectives, and interventions. It auto-populates relevant data like diagnoses and medications and allows all necessary team members to add assessments and documentation directly to the treatment plan, ensuring comprehensive patient information. Treatment details can be transferred to provider notes, Session Manager, and Group Notes for tracking progress and attendance.

COMPREHENSIVE DOCUMENTATION

Juno EHR provides extensive clinical documentation features. With its Clinical Content Builder (CCB), you can create personalized templates for various notes and assessments. With over 400 pre-built templates for behavioral health, substance use, and infection control, users can also configure unlimited additional templates to meet any specialty's documentation standards.

GROUP NOTES

Juno EHR's Group Notes feature allows providers to document group therapy sessions for multiple patients simultaneously, while also capturing individualized details. It integrates with treatment plans to ensure accurate attendance, participation records, and automatic progress updates, streamlining the documentation process.
