

CRITICAL ACCESS HOSPITALS

YOUR SMALL HOSPITAL IS A BIG DEAL TO US

Juno Health's cloud-based acute care solution has everything your Critical Access Hospital needs right out of the box. Its streamlined design cuts down on frustrations and frees healthcare providers to spend more time with their patients and less time charting. It is an affordable, user-friendly solution that is built BY clinicians FOR clinicians.

Our modern, ONC certified EHR is designed with HL7 FHIR APIs as a starting point—not a retrofit. It is USCDI compliant to support true interoperability and clinical integration throughout your enterprise. With our single tenant deployment, you are not tied to other organizations and our simplified, accelerated implementation results in lower costs and a shorter time to value.

At Juno Health, we understand the unique challenges of rural healthcare and are ready to help you meet them.

THE JUNO EHR FOR ACUTE CARE DIFFERENCE

These powerful, intuitive features are designed to make it easier and more efficient for you to provide excellent care and achieve better patient outcomes.

SURGERY MANAGEMENT

Juno EHR's Surgery Management simplifies perioperative care to reduce documentation time, improve accuracy, and enhance patient outcomes. Integrated with applications like Order Management, eMAR, Scheduling, and Registration, it ensures accurate data capture and seamless sharing among care teams. Backed by AORN Syntegrity standards, it offers customizable preference cards, tracks patient data through perioperative phases, and provides reports on quality, productivity, throughput, and cost.

NATIVE E-PRESCRIBING

Juno EHR's e-Prescribing is a versatile, web-based solution for various care settings, including small hospitals. Its customizable options support controlled substance prescribing with two-factor authentication and real-time drug data from First Data Bank, and it is certified by ONC, DEA, and Surescripts for secure electronic transmissions.

PRODASH

ProDash streamlines workflows with human-centered design, real-time analytics, and patient-specific notifications. It identifies risks, suggests additional treatments, and supports value-based patient care, enabling clinicians to easily make informed decisions.

CLINICAL ACTION CENTER

The Clinical Action Center provides nurses with a real-time summary of clinical information to help plan and prioritize shifts effectively. It features a Patient Card for detailed notifications, a smart task list, and configurable options tailored to specific units, patients, and individual preferences, reducing search time and improving shift transitions.
