

#### STATE MENTAL HEALTH

# BETTER OUTCOMES BEGIN WITH BETTER THINKING

Juno Health's cloud-based behavioral health solution is designed with the end user in mind. With unprecedented, system-wide customization capabilities that are governed at the organizational level, Juno EHR for Behavioral Health can be adapted by facility, department, or role. With this level of personalization, workflows work the way you do, and documentation captures all vital points of data, without redundancies or irrelevant fields. And all this can be done without vendor involvement.

Our behavioral health EHR is intuitively designed to anticipate the unique needs of state mental health facilities. It includes more than 150 assessments and documentation, extensive Treatment Plan options, and helpful features like Group Notes, Session Manager, and robust scheduling. Additionally, our single dashboard design allows clinicians to review information without clicking from screen to screen, saving time and reducing frustrations.

Juno Health's EHR solutions were developed through decades of experience in some of the most complex and heavily regulated care systems in the world. We have more than thirty years of experience working with government agencies, which gives us the understanding needed to navigate your unique challenges.

## THE JUNO EHR FOR BEHAVIORAL HEALTH DIFFERENCE

These powerful, intuitive features are designed to make it easier and more efficient for you to provide excellent care and achieve better patient outcomes.

#### SINGLE DASHBOARD CONVENIENCE

With our behavioral health solution, you no longer have to constantly click back and forth between different screens to compile, share, and access vital patient information. From one screen, team members can view, analyze, and determine the next steps in the patient's care.

The Treatment Plans application offers pre-configured behavioral health templates with suggested goals, objectives, and interventions. It auto-populates relevant data like diagnoses and medications and allows all necessary team members to add assessments and documentation directly to the treatment plan, ensuring comprehensive patient information. Treatment details can be transferred to provider notes, Session Manager, and Group Notes for tracking progress and attendance.

#### **COMPREHENSIVE DOCUMENTATION**

Juno EHR provides extensive clinical documentation features. With its Clinical Content Builder (CCB), you can create personalized templates for various notes and assessments. With over 400 prebuilt templates for behavioral health, substance use, and infection control, users can also configure unlimited additional templates to meet any specialty's documentation standards.

#### **GROUP NOTES**

Juno EHR's Group Notes feature allows providers to document group therapy sessions for multiple patients simultaneously, while also capturing individualized details. It integrates with treatment plans to ensure accurate attendance, participation records, and automatic progress updates, streamlining the documentation process.

As a division of DSS, Inc., Juno Health brings over 30 years of experience in the development of clinical software and integrated systems. DSS, Inc. is a health information software development and systems integration company, providing services and solutions used daily by thousands of clinicians and administrative staff nationwide, in the public and private sectors.
