

CAN YOU REALLY AFFORD BUSINESS AS USUAL?

With most EHRs, you're stuck. Stuck in the past with legacy technology. Stuck with workflows that impede the quality of care instead of improving it. Stuck waiting for changes to be made by the vendor. And stuck with substantial costs once those changes are made.

TOO MANY WORKFLOWS JUST DON'T WORK

Nothing should get in the way of providing the highest quality of care possible. But many EHRs hinder care instead of supporting it because of their shortcomings.

- Complex and inefficient workflows
- The need for staff to create and use workarounds
- Every change to the system requires contacting the vendor, spending money, and waiting on long lead times

RIGID SYSTEMS LEAD TO ROADBLOCKS

The shortcomings of traditional EHRs aren't just an inconvenience. They have tangible, negative impacts on your staff's ability to deliver quality care.

- Frustrating hurdles lead to burnout which, in turn, leads to staff shortages and costly turnover
- Workarounds waste time, lead to information falling through the cracks, and reduce time spent face-to-face with patients
- Expensive off-site customization eats into budget and keeps staff waiting for crucial changes, while patient outcomes suffer

EHRs WERE SUPPOSED TO REVOLUTIONIZE CARE. WHAT HAPPENED?

92%

of doctors say inefficient EHR systems negatively impact quality of care*

58%

of doctors cite document burden as their greatest cause of burnout**

63%

of doctors say time-consuming, burdensome reporting systems are their biggest pain point*

* Joe Corkery, MD, "Physicians say better data interoperability will save lives," Google Cloud, July 20, 2021

** Dennis Thompson, "Almost Two-Thirds of U.S. Doctors, Nurses Feel Burnt Out at Work: Poll," US News & World Report, February 23, 2023

IT DOESN'T HAVE TO BE THIS WAY.

IT'S TIME TO TURN A NEW PAGE

INTRODUCING THE

CLINICAL CONTENT BUILDER

Juno EHR's Clinical Content Builder offers easy personalization that can be done on-site, in real-time, without vendor involvement or spending budget, so it supports your clinical staff in ways a one-size-fits-all solution never could.

The **Clinical Content Builder** is a collection of tools within Juno EHR that allows you to build and personalize custom Flowsheets, Note Templates, and Modules. This means you can easily create workflows from scratch or make adjustments to existing workflows to meet your needs.

THE PERKS OF PERSONALIZATION

Clinical Content Builder allows your clinicians to make the system work the way they do. With simple drag and drop functionality and a graphical interface, it no longer takes an expert to create personalized workflows. And when a new need arises, you can address it without spending budget, experiencing down time, or waiting for changes to be made by a vendor.

IMPROVE QUALITY OF CARE

Less time and resources spent entering and retrieving data means more time spent with patients.

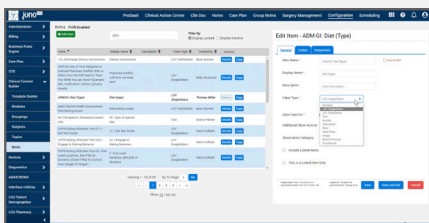

EMPOWER YOUR CLINICIANS

Juno EHR's workflows can be tailored by facility, department, and role without spending vendor dollars.

FLEXIBILITY COMES STANDARD

Personalization makes it easy to stay ahead of ever-evolving regulatory or organizational workflow needs.
